# HR Management

## Access Control

This tool allows the head of operations to manage employee credentials and the functions within the platform that employees are able to navigate and alter.

## Driver Background Checks

Carry out a vetting process of new employees, find out what was the experience of other **NTOMS** using peers with potential new recruits.

## Employee Profile

Manage all employee details, from kins to performance and discipline documentation.

## Logs

Track all employee inputs, logins and work in real time.

# Vehicle Management

## Vehicle Status

Track the days of the month the car was active and on the road, when service is due for individual vehicles or ones that are unavailable for operation due to an array of factors.

## Alerts

Allow you to keep abreast of the expiry of vehicle operating and road licenses, as well as driver's license and PDP (permits for transporting the public or hazardous chemicals) where applicable.

## Routes and Ranks (Depos)

Map out where your vehicles are frequently stationed and travel to.

# Bookkeeping and Insights

## Financial Books

Keep up to date financial records and actively track income and expenditure costs. **NTOMS**

Bookkeeping also allows users that are associations to monitor membership fees and fees relating to group scheme premiums where applicable.

## Print

All data of an account can be printed, the output files are tagged with a unique document ID to ensure security and integrity of the data.

## Insights

Data forwards entities to make sound business decisions, to this end the **Fleet Management System** renders stats in relation to the gender and age composition of the organisation, comparison of more profitable routes between vehicles, vehicle colour and make.

These stats may assist entities carve out new revenue streams through advertising and industry related deals such as discounts and voucher programmes.
